Sodium saccharin

SODIUM SACCHARIN

Non caloric sweetener and for electroplating bath brighteners.

- Chemical Name: 1,1-Dioxide-1,2-benzisothiazol-3(2H)-one, sodium salt
- E Number: E954
- Empirical Formula: $C_7H_4NNaO_3S \cdot 2H_2O$
- Molecular Weight: 205.16
- Structural Formula:

FOOD USE: Baked goods/ Fruit, vegetables and nut products (fruit drinks, preserves)/ Beverages (cola beverages, coffee)/ Soft drinks/ Sugars, sugar preserves and confectionery (table-top sweeteners, candies, preserves, chocolate products)/ Vinegar, pickles and sauces (salad dressings)/ Other (oral hygiene products, chewing gum, gelatin desserts, cocoa)
